

DEVELOPING INNOPRENEURSHIP, SUSTAINABILITY & CULTURE

Break free from the limitations of traditional education!

Since 2000, universities have recognised the need to extend their impact beyond campus boundaries to achieve Sustainable Development goals within communities. Yet, only isolated efforts have been made to develop a comprehensive approach that spans learning, research, and collaboration across educational and business sectors. Embark on a journey of competence development and validation in sustainability literacy at European Higher Education Institutes. The DISC Project is not just a project, we want to foster lasting collaboration among students and educators to create a sustainable future.

CORE ELEMENTS OF DISC

Sustainability Literacy

Competence
Development &
Validation

Collaboration Across Sectors

Academia-Business
Cooperation

Innovation & Entrepreneurship

Design-Based
Collaborative Learning &
Research

What DISC Offers

- Interdisciplinary Learning
- Academia-Business Cooperation
- Sustainability Projects
